Double-Entry Accounting Integration & Transaction Mappings

This document describes the double-entry accounting mapping configurations for all core business transactions in the software (wallets, loans, investments, remittances, and charges). Every transaction generates a balanced journal entry that updates the real-time balances of the ledger accounts automatically.

Core Double-Entry Rules

1. **Assets** (e.g., Cash, Loans Receivable): **Debit (Dr)** increases balance, **Credit (Cr)** decreases balance.
2. **Liabilities** (e.g., Wallet Deposits, Investments, Remittance Clearing): **Credit (Cr)** increases balance, **Debit (Dr)** decreases balance.
3. **Revenue/Income** (e.g., Loan Interest, Fees, Commissions): **Credit (Cr)** increases balance.
4. **Expenses** (e.g., Investment Interest Expense): **Debit (Dr)** increases balance.

Transaction Mapping Configuration Table

System Transaction Type	Account to Debit (Dr)	Account to Credit (Cr)	Accounting Explanation / Logic
Wallet Funding (Deposit)	1000 - Cash at Bank	2000 - Customer Wallet Deposits	Increases Cash Asset (+Asset) Increases Wallet Liability (+Liability)
Wallet Withdrawal	2000 - Customer Wallet Deposits	1000 - Cash at Bank	Decreases Wallet Liability (-Liability) Decreases Cash Asset (-Asset)
Transaction Fees (Charges)	2000 - Customer Wallet Deposits	4100 - Transaction Fee Income	Decreases Wallet Liability (-Liability) Increases Fee Income (+Revenue)
Loan Disbursement	1200 - Loans Receivable	2000 - Customer Wallet Deposits	Increases Loan Asset (+Asset) Increases Wallet Liability (+Liability)
Loan Repayment (Principal)	2000 - Customer Wallet Deposits	1200 - Loans Receivable	Decreases Wallet Liability (-Liability) Decreases Loan Asset (-Asset)
Loan Interest Repayment	2000 - Customer Wallet Deposits	4000 - Loan Interest Income	Decreases Wallet Liability (-Liability) Increases Interest Income (+Revenue)
Investment Creation (Deposit)	2000 - Customer Wallet Deposits	2100 - Customer Investments Held	Decreases Wallet Liability (-Liability) Increases Investment Liability (+Liability)
Investment Returns (Payout)	5000 - Investment Interest Expense	2000 - Customer Wallet Deposits	Increases Interest Expense (+Expense) Increases Wallet Liability (+Liability)
Investment Withdrawal (Principal)	2100 - Customer Investments Held	2000 - Customer Wallet Deposits	Decreases Investment Liability (-Liability) Increases Wallet Liability (+Liability)
Remittance Created (Sent)	2000 - Customer Wallet Deposits	2200 - Remittance Clearing	Decreases Wallet Liability (-Liability) Increases Clearing Liability (+Liability)
Remittance Payout (Received)	2200 - Remittance Clearing	1000 - Cash at Bank	Decreases Clearing Liability (-Liability) Decreases Cash Asset (-Asset)

Capital/Equity Audit Requirement

Important Note: Any debit transaction on a Capital (Equity) account decreases Capital and is an extremely rare operation. Consequently, any debit to an Equity account will trigger an automated, high-importance entry in the system's Audit Trail (activities log) capturing the exact amount, account name/code, journal reference, and initiating actor.
